

Romatec Inc. is a representative and distributor of Process Control, Instrumentation and Analytical products. Romatec has continued to be a world class solution company for over 50 years.

Romatec Inc. has an engineering team that designs, commissions and takes single source responsibility for any analytical/monitoring and automated control system.

Our capabilities include computer automation with industrial PLC's and communication protocols. We provide seamless transfer of analytical data to SCADA and DCS devices. We design and integrate user Control Panels with our Seepex and Pulsafeeder pump equipment. Romatec measures and records velocity, temperature and composition of fluids and gases. We are a full-service OEM of turn-key process control and Continuous Emission Monitoring Systems.

Diversified product application knowledge from over 50 years of experience can advance your business. Romatec balances affordability and functionality; from basic to complex. Flexible and custom engineering allows us to suit your expectations and requirements. Romatec is the best choice to ensure quality and minimize downtime.

Industry Experience:

- Steel
- Automotive and Aerospace
- Food and Beverage
- Mining
- Tobacco
- Oil and Gas Refinery
- Chemical Processing
- Power Generation
- Pharmaceutical
- Agriculture
- Pulp & Paper
- Biogas and Landfill Gas
- Waste Water Treatment

Romatec is the best choice:

- Extensive line-up of premium quality components.
- Application advice and support.
- In-house repair.
- Field service.
- Start up and commissioning.
- Training and technical support.
- Full maintenance service contracts for parts and systems.
- Automation programming with PLC software.
- HMI and Touch-screen programming.
- Process data compilation and distribution software.

Field Services Include:

Site Assessments, Implementation Plans, Inspection and Calibration of Instruments at your facility. We have specialized test tools and knowledge required for cost effective predictive and preventative maintenance programs.

Documentation and Planning:

A clear and strategic plan is the best way to ensure your system is effective. Romatec provides Quality Assurance and Operation Instruction Manuals for our Integrated Systems with detailed process descriptions, engineering drawings and component characteristics. Romatec archives your documents with our Intranet for 24H private access.

Environmental Solutions:

Our equipment is guaranteed to meet and exceed your specific governing regulations such as the MOE 1/PG/7 or Alberta guidelines.

Romatec supplies equipment and solutions for your **Class I Div I and II hazardous areas**. All equipment/panels supplied by Romatec will have the affixed labels from the approved agencies.
